## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments, see Remarks (page 4, paragraph 3), filed 8/17/2006, with respect to claims 9-14 have been fully considered and are persuasive. The rejection of claims 9-14 has been withdrawn due to the cancellation of these claims.

### ***Allowable Subject Matter***

2. Claims 1-8 are allowed.

3. The following is an examiner's statement of reasons for allowance:

\* Rejected claims 9-14 have been cancelled to place the application in allowance condition;

\* The present invention provides a new method and system for constructing MPEG I-frame using a JPEG circuitry or other engine in a camera or other imaging device to assist by performing the processing steps common to both JPEG and MPEG while allowing the remaining processing to be performed efficiently (see specification, page 14, lines 10-13).

Particularly, the new method and system comprise the following features, which the prior art taken either singly or in combination does not teach:

- performing JPEG processing, using the JPEG engine, on an uncompressed digital image of a scene, producing JPEG data in which the discrete cosine transform coefficients are encoded in a byte-aligned manner (see independent claim 1);

Art Unit: 2624

- configure the JPEG engine to produce a data stream in which discrete cosine transform coefficients are encoded in a byte-aligned manner (see independent claim 6);

- means for configuring the JPEG processing means to produce a JPEG compliant data stream in which all discrete cosine transform coefficients are encoded in a byte-aligned manner (see independent claim 8).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
